

What are 3 HTML elements not mentioned any of the video this week? What do they do and how are they used?

Choose one of your favorite websites and identify 5 different HTML elements used on the website. Make sure to include the URL in your submission.

'Youtube.com'

<Header> for the logo and search bar.

<div> to organize sections of videos and content.

<a> used for hyperlinks

<video> used to displays videos and content

Footer the companies info such as links, and contact info.

What I've learned is how different languages such as java script. Html, and CSS are used in all sorts of websites and stuff we use everyday.
